(5) Services Offered

We create a portfolio of companies that adhere to the following three criteria.

- i. The company has to be available at prices that are at reasonable discount to their intrinsic value.
- ii. The company should have a proven record of high level of profitability, dividend paying capability and a business model that has a proven ability to do well through different economic conditions.
- iii. Future prospects for the company over time should look good and the company must be taking the right steps to capitalize on this opportunity.

We generally invest in cash rich, dividend paying, highly profitable companies that are available at reasonable discounts to their intrinsic value, but not limited to those only, if alternative opportunities are attractive enough.

Investments would be made primarily in listed equities. In a situation where we do not find sufficiently attractive opportunities, the excess funds would be invested in Bank deposits or Money market / bond Mutual Funds. We expect to create a diversified Portfolio of such stocks.

There are no listed group companies. Therefore, we do not expect to invest in any of Banyan Tree Advisors's group / associate companies.

(6) Risk Factors

The following are the risk factors as perceived by the management:

- (i) The PMS will be implemented strictly in accordance with SEBI (Portfolio Managers) Rules and Regulations, 1993 and amendments thereto. Investors are requested to familiarize themselves with these regulations.
- (ii) Securities investments are subject to a wide range of market risks, which may lead to an unpredictable loss in value of the Assets, which may extend to a total loss of value of the Assets.
- (iii) The Portfolio Manager does not guarantee or assure the client of the value of or returns on the Assets, in any manner whatsoever. The value of the Assets under the Discretionary Portfolio Management Service may depreciate to an unpredictable extent.
- (iv) The past performance of the portfolio manager, promoters or Directors is not indicative of and does not guarantee future performance of individual portfolios.
- (v) The performance of individual portfolios may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- (vi) Investments in debt instruments are subject to default risk and interest rate risk. Interest rate risk results from changes in demand and supply for money and other macro-economic factors and creates price changes in the value of the debt instruments. Consequently, the NAV of the portfolio may be subject to fluctuation.
- (vii) Investments in debt instruments are subject to re-investment risks as interest rates prevailing in interest or maturity due dates may differ from the original coupon of the bond, which may result in the proceeds being invested at a lower rate.
- (viii) The portfolio manager may use derivative instruments like index futures, stock futures and option contracts, warrants, convertible securities, swap agreements or any other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI (Portfolio Managers) Rules and Regulations, 1993. Usage of derivatives will expose the individual portfolios to certain risks inherent to such instruments. As and when the portfolio trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialised instruments that require investment techniques and risk analysis, which are different from those, associated with stocks and bonds. The use of a derivative instrument requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the Portfolio and the ability to forecast price or interest rate movements accurately.
- (ix) The Portfolio Manager has a track record of more than 10 years.

(7) Client Representation

- (i) Banyan Tree Advisors will make best efforts to manage client accounts in the best interest of the client. Banyan Tree Advisors shall not benefit from individual client account in any other manner apart from the management and performance linked fee charged to the client.

(8) Portfolio Management performance and in case of discretionary Portfolio Manager, disclosure of performance indicators calculated using weighted average method in terms of Regulation 14 of the SEBI (Portfolio Managers) Rules and Regulations, 1993.

Banyan Tree Advisors Pvt Ltd

(9) Nature of expenses

The Portfolio Manager typically offers the following fee structure to its clients.

Banyan Tree Advisors PMS

The fee charged by Banyan Tree Advisors comes with a certain underlying philosophy. In the event we have not added value to the client, we don't deserve to get paid. Therefore, fees of any form is applicable if and only if the overall portfolio return to client is above the risk free rate of return, which we have defined as 5% for the purposes of simplicity.

- (i) Management Fee: There is no fixed annual fee charged to the client.
- (ii) Performance Fee: The investor pays a performance fee of 20% of the return over and above a hurdle rate of 5% pa.
- (iii) In the event the portfolio return is less than 5% in a year, the performance fee for the next year will be applicable after the portfolio makes up for the previous year's 5% threshold and the subsequent year's threshold of 5%.
- (iv) The above fees do not include expenses such as brokerage (0.12% on the transaction), custodian fee, depository fees, bank charges, charges and levies by Government or other regulatory authorities, such as GST and other charges levied by third parties in connection with transactions executed by the Portfolio Manager on behalf of the client. All aforementioned transaction related expenses would be to the account of the client on the basis of actual expenses.
- (v) The Custodian fee is 0.05% per annum of the value of the assets based on a monthly closing balance and an additional 0.02% of individual transaction value. The same shall be paid directly from the portfolio to the Custodian. This is inclusive of depository fees and other bank charges, if applicable.

(10) Taxation

Under the PMS, the onus of income tax payable on capital gains, dividends, interest or any other taxable income is on the Investor. The Portfolio Manager will provide adequate statements on a periodical basis, prior to the due dates of income tax payments, to enable the investor to meet their tax obligations under the Income Tax Act, 1961.

(11) Accounting Policies

- (i) Investments introduced by the client into their respective portfolios are booked at the market value as of the date of introduction into the portfolio.
- (ii) Profit or Loss on sale of investments is calculated using the "First In First Out" (FIFO) method of accounting.
- (iii) As far as possible the Portfolio Manager is complying with the relevant Accounting Standards issued by the Institute of Chartered Accountants of India. Stocks, for NAV purposes, would be valued based on the closing stock prices on National Stock Exchange. If the stock is not listed on NSE, closing prices on Bombay Stock Exchange would be used. Revenue arising from interest and dividends is accounted for on accrual basis.
- (iv) The investments under the PMS are made on behalf of and in the respective names of the Investors. Hence, separate bank accounts and depository accounts are opened in the name of the Investors, which are operated by the Portfolio Manager duly authorized by a Power of Attorney. All settlements and custody of assets are handled by a recognized Custodian.

(12) Investor Services
